FRONT ELEVATION

PREMIUM SITE PROTECTION & IMPALEMENT DEFENSE

Engineered with high-visibility polymer matrices to secure exposed reinforcement bars on heavy construction grids.

ADVANCED PERFORMANCE FEATURES

- **High Visibility:** Molded in vibrant warning yellow for instant awareness across low-light zones.
- **Weather Resilience:** Treated with advanced UV-stabilizers to prevent structural degradation under scorching sun.

APPLICATION COMPLIANCE

- **Impalement Protection:** Visually highlights dangerous exposed steel ends to prevent minor cuts and abrasions.
- **Universal Versatility:** Ideal for standard structural concrete works, foundation pillars, and columns.

AVAILABLE SIZING MATRIX

PRODUCT MODEL GROUP	COMPATIBLE REBAR DIAMETER RANGE	PRIMARY COLOR DESIGNATION
MODEL RSC-01 (COMPACT)	8mm – 16mm	Safety Warning Yellow
MODEL RSC-02 (STANDARD)	16mm – 32mm	Safety Warning Yellow
